Field of the Invention The present invention relates to a magneto-optical recording medium having a magnetic layer for recording information signals and a magneto-optical recording medium having an optical recording layer in which information is recorded. The present invention also relates to a method of reproducing information from such a magneto-optical recording medium and an apparatus for recording and reproducing such a magneto-optical recording medium. 2. Description of the Related Art A magneto-optical recording medium has an optical recording layer and a magnetic layer. The optical recording layer is formed of, for example, an amorphous alloy or a semi-amorphous alloy. When light is irradiated to the optical recording layer, the temperature of the optical recording layer increases, and the coercive force of the optical recording layer is lowered to lower the magnetization of the optical recording f30f4ceada
