

Magnus Choir VSTi: Mangus is a virtual instrument (plug-in for a choir program) that can be used to create natural and synthetic choirs by combining . More and more people are switching to a more intuitive and clear interface that does not take much time to perform routine tasks. Unfortunately, the process of switching between choirs and editing them in most programs is rather complicated. With the release of VSTi Instruments, which will include all the software you need to create, edit and manage choirs, the workflow will be even easier. Today we are going to take a look at one of these tools.
