What's New in the?

Website online Checker is a simple and easy to use application designed to provide you with a quick means of verifying the availability of a website, in just a few moments. The program does not require an installation process, so you can work with it immediately after download. Just double click the file and it will display a small, non-resizable window where you can input the URL address of the website you are targeting and click on the 'Check' button. In just an instant, Website online Checker will display the status of the website, showing a small message stating if it is online or not. As you can see, the utility is very intuitive, requiring no knowledge or experience in working with similar tools. The application is very lightweight, requiring a minimal level of system resources, meaning it will not interfere with your other activities or cause lag and other unresponsiveness issues. Using Website online Checker, you can determine if the website you are having trouble accessing is indeed down, or if the problem is with your system or maybe even your Internet connection. It allows you to check that specific website, without having to call on to friends for help, for them to verify it as well. Moreover, using this small tool spares you from having to launch all the web browsers installed on your system, in order to make sure that this is not the issue causing your inability to access your favorite website. To summarize, Website online Checker is a useful and efficient piece of software that enables you to determine whether a website is online or not, in just a few moves. Download Website Checker for FREE! If you have a website, chances are that you are well aware of the fact that you need to check your website regularly and see if your visitors are there. This is a part of good marketing that is practiced by many businesses to see if their website is working the way it should, before they make any major changes to their website or spend money on promotion. But this comes at a cost to you. You have to call your friends and acquaintances to ask them to visit your website, so that you can verify if your website is working. This is not something that is ideal for the majority of people who do not like calling people and asking them to visit their websites. One of the best ways to verify your website is to visit your site and see if it works. This is why we have created Website online Checker. This is a small, free tool that will allow you to see if your website is online, and if it is down, you can call up a friend to check if the website is online or not. To use this utility, you just need to click on the website address of your favorite website and Website online Checker will visit the website automatically. As soon as it

System Requirements:
