How to use Ainishare File Lock Standard? Ainishare File Lock Standard is a file encryption software which can help to encrypt files, folders and drives on your local computer, it protects files using a master password. Tightly integrated with the file system means that a encrypted file is never accessible as such, only as an encrypted file with the password. This allows you to set a password and never forget it. Any change of the password can be done simply by re-entering it. This makes it possible to protect any volume on your hard disk. All operations are available from within the user interface and can be performed in a very quick and easy manner. Ainishare File Lock Standard is a simple application that works with the file system in Windows. Data remains unchanged on disk. The secret password is stored in the registry and on the disk itself. It can be easily imported and exported. The application stores all the information in an encrypted form, so that it is hidden from all potential uninvited eyes. Thus, it is completely invisible to anti-virus software and other protection tools. Ainishare File Lock Standard protects against thieves because they cannot see the data, but it also offers complete protection against the user himself. This tool allows you to lock folders and files so that the contents can not be viewed or changed. Locking folders is a convenient
