please be kind enough to explain it to

me in easy. WASHINGTON
(MarketWatch) — The percentage of
Americans working has hit a new
low, and there's little doubt
unemployment has been even higher
in recent months. But despite the
recession's prolonged duration, the
U.S. recovery has been strong. After
adjusting for inflation, real wages are
higher than they were in the late
1970s. Housing prices have
improved. Stock-market performance
has been strong. And worker
confidence is at a multiyear high. The
effects of the recession have been
dented. The nation has lost about
10% of its jobs, but the impact has
been softened by a 17% drop in the

size of the labor force, and the retirement of the baby boom generation. Economists say these factors will keep the decline in workers' number and average annual earnings from having a significant impact on the economy. Even so, the recovery is slow 3e33713323
