This article summarizes the basics of AutoCAD 2017. Note that most of the information in this article is valid for AutoCAD 2015, 2016, or 2017. The capabilities of AutoCAD 2017 for the Microsoft Windows operating system are similar to those for AutoCAD 2016. The capabilities of AutoCAD 2017 for mobile devices (iOS and Android) are similar to those for AutoCAD 2016. The capabilities of AutoCAD 2017 for web applications are the same as those for AutoCAD 2016. This article explains how to create and edit drawings and how to run commands. It also describes commands that can be used to create and modify objects and layers.

For more information on drawing, see Drawing Basics (page 2 of this article). For more information on features of the various drawing tools, see Drawing Tools (page 3 of this article). Creating a drawing To create a drawing, follow these steps: Start the drawing application (AutoCAD 2017 for Windows) by choosing Start⇒CAD. On the main screen, choose File⇒New. In the New Drawing window, choose the drawing format you want to use. AutoCAD can read and create drawings in the following file formats: DWF, DGN, DGN, DXF, and PDF. Note You can also create DWF files. However, these are newer and more complex file formats than the other file formats. You can also create DGN, DXF, and PDF files. However, these are newer and more complex file formats than the other file formats. On the drawing options dialog box, for Autodesk DWF, follow these instructions: To choose the source file format, click DWF File Type (and DWF File Size), or click Advanced. To choose the drawing size and location, type the drawing size and location (or change the default values) in the Drawing Size and Location section. In the Drawing Size and Location section, type the drawing size in the Width and Height text boxes and a location in the Drawing Center of the Drawing Size box. For example, for a drawing size of 13.5 x 11.7 inches (33.65 x 28.86 cm), type a location of C:/Users/UserName/Desktop/somedrawing.dwg. To choose an output file format, type an output file format in the DWF Output File Type
