Keymacro is a keyboard recording tool that allows you to record the hotkeys you use most often. It will record the keyboard's in real time. And you can enjoy the recorded keyboard hotkeys on a portable keyboard, on any PC, or even on mobile devices. Keymacro has an optimized interface, which makes it much more user friendly than similar applications in the market. After you activate it, you can set up the necessary parameters for recording and start making the keyboard recordings. After the recording is completed, the program automatically adds keywords to the file, in order to facilitate search and editing, and to make it more accessible. Keymacro is an easy to use recording program that provides all the functions you need. [1] Features Record hotkeys with keywords: With Keymacro you can record your keyboard's hotkeys at any time, either while using the keyboard or not. Keywords: You can set up up to six words, in which you can type the hotkeys you use. Simply type in the keywords and press 'record', and Keymacro will take a note of the keyboard's hotkey and add the keywords automatically. You can add as many keywords as you want. You can set up these keywords to a file, as well as add keywords directly in the recording file. Support for nearly all standard keyboards: With Keymacro you can record hotkeys from virtually any keyboard that has a QWERTY keyboard. Record on Mac or Windows: You can use the recording feature on both Windows and Mac systems. Sync recordings: After recording, you can easily sync the files to a portable keyboard or any other device. You can access your recorded files at any time, in order to edit them, as well as add keywords in order to tag them. If you need to transfer your file to another platform, you can do that easily. You can also export the entire recording file in MP3 format, for use with portable speakers or mobile phones. [2] Screenshots Keymacro menu Every day you spend most of your time working with Windows. You open files, programs and do a lot of tasks. This is when mistakes happen the most often. As a result, you lose your important data and your important work is damaged.

## Free MKV Player (LifeTime) Activation Code Free Download [Win/Mac]

Free MKV Player is a small software application whose purpose is to help you play MKV files exclusively. User-friendly layout The tool implements an intuitive behavior, so tweaking the dedicated parameters proves to be an easy task. Videos can be uploaded in the working environment using the built-in browse button, so you cannot rely on the drag-and-drop support. Additionally, you can switch to a full screen or resize the main panel to fit your viewing needs. Playing capabilities Free MKV Player gives you the possibility to play, pause, or stop the current video selection, go to the previous or next clip, seek for a position in the video stream, alter the volume, as well as increase or decrease the speed. What's more, you are allowed to open up a playlist, randomize the order of the songs in the playlist, add or remove MKV files, as well as save the current playlist to M3U file format. Performance The lack of configurable settings can be good news for beginners, as they can learn to master the entire process with minimum effort. During our testing we have noticed that Free MKV Player carries out a task quickly and provides very good output results. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not affected. Bottom line To sum things up, if you are looking for a straightforward software solution for helping you play MKV files, you may give Free MKV Player a try and see what it can do for you. The intuitive layout and basic playing features make it an ideal app especially for rookies.
