Editing tools Any program that is used to perform image editing is referred to as a **photo editing program** (**PEP**). The programs discussed here are the most widely used. Some image editing programs have specific tools for retouching the skin, but they all have layers and are used for editing all types of images, not just portraits. Unlike other photo editing programs, Photoshop uses layer-based editing. Photoshop was designed to edit raster images, so it does not support vector-based files such as the **Gimp**. However, using Gimp in conjunction with Photoshop enables you to edit vector files.

Imen, Tout va bien. Pourtant je suis très triste. Ça ne se sent pas bien. Dans la famille, la télévision est ponctuellement la première activité. Le soir, il y a huit lignes en boucle. Deux, trois, quatre, cinq. Quatre, cinq, sept… Pendant six heures, le petit-déjeuner, le petit déjeuner, le déjeuner, le dîner, le soir, trois lignes. Le déjeuner est salé. Les billets ne sont pas chiffrés. Dans les deux établissements, il n'y a aucun abonnement à la télévision. A mon arrivée, la télévision est devenue la nouvelle activité. Avec Chiraq, la télévision se transforme en cinéma. Avec Chiraq, l'esthétique de notre quotidien s'exalte. Avec Chiraq, les politiques et les acteurs sur les autres chaînes de la chaîne ne comptent pas. Avec Chiraq, je suis l'épicentre de la vie de tous et de toutes. Avec Chiraq, les dieux entrent à bord. Avec Chiraq, je crois à la bonne vie que nous sommes sur le point de connaître. Avec Chiraq, il se passe beaucoup de choses au cours de l'année. Après 10 jours de cours, après 30 jours de travail, je ne sais pas. Je suis un maniaque de baseball. C'est la féerie des sportifs. La première chose que je vais faire, c'est lire le match. C'est insensé : une fois à la semaine, je vois le match. Mon premier travail le soir est de regarder l'entraînement du grand objectif

Schools The schools mission is to provide a rigorous, nurturing and supportive environment to learn and grow in a safe and nurturing environment. The importance of pre-service training for new teachers and the importance of engaging with young people as engaged citizens are crucial components in the schoolís teaching and learning programmes. School Guidance and Support Our school guidance support is an integral part of the schoolís infrastructure. Guidance roles engage with students as students and may work as part of a class teacher, deputy, or as part of an alternative class teacher team. Our network of linked provision benefits from a guiding and support team of professional and experienced staff who have specialisms to ensure that we offer a full provision of services: I think it is important to state that some of the areas in which I have experience are not fully researched and have perhaps been gained through experience, such as: Teaching Practice One of my main challenges within teaching practice is that there is a large range of different types of learners. To overcome this, I try to take an attitude of openness and being free to create and collaborate with others. Resources & Curriculum Having the capacity to organise and adapt resources and curriculum has helped me to teach effectively. Communication I have found that effective communication is often a challenge when teaching, but it is important that we are able to communicate with one another clearly. Compassionate Professionalism It is important for me to be compassionate to all the students, staff and parents. As a teacher my aim is to be a positive role model for other people. I work hard to achieve this. I can find my most effective teaching I see my most effective teaching as engaging and interactive - as asking questions, being curious and being creative. I believe it is also important that we are respectful of what our students are able to do.Q: Web API - How to make something like MVC HomeController? I'm trying to build an API using the Web API. I'm not trying to make my API look exactly like the MVC HomeController. I just want to have the API returns the data and I don't want to make too many calls from the client to the server. My idea is that it would make the server more performance by doing the calls from a different layer. public class HomeController : ApiController { private List
