Check out the Resources section at the end of this book for more Photoshop help. * * * # Spatially enabled Much of Photoshop has become a trigger for the Spatial app, which enables advanced spatial operations. This is an app that can be used in conjunction with Photoshop or on its own for creating maps, wireframes, and animations. It is used for very sophisticated user interfaces and graphics. Spatial enables raster graphics as well as vector illustration. An example of a vector manipulation is shown in Figure 6-14, and an example of a raster image manipulation is shown in Figure 6-15. **Figure 6-14:** Drawing in the Spatial app enables you to move around an image without affecting the pixels. **Figure 6-15:** Changing an image in the Spatial app doesn't change the pixels. # Accessible to everyone Photoshop has helped to level the playing field, giving people with disabilities an equal opportunity to do work in the digital realm. Companies have worked on creating accessible software.

Atheism/Living in San Francisco The city of San Francisco is an atheist's dream. Your average native San Franciscan is a liberal, tolerant, open minded individual who wears a Buddha on his head in the morning. But, when they get into a philosophical discussion with you about the existence of god, they are instantly transformed into a theist. They stand around in a circle trying to shout you down. I am an atheist living in San Francisco. Which is why I enjoy the continual clash of cultures that exists in this city. With so much diversity, comes great conversation. The passionate debates have been great for getting to know my fellow atheists and I am often surprised to learn that some of my closest friends are actually theists!Q: Sort array of Objects by property value I have the following code where I loop through my array of objects var arr = [{ firstName: 'Chris', lastName: 'Smith', age: 20 }, { firstName: 'Smith', lastName: 'Jone', age: 20 }, { firstName: 'Ossy', lastName: 'Ali', age: 20 }, { firstName: 'Karl', lastName: 'Roland', age: 23 }, { firstName: 'Mark', lastName: 'Ferrari', age: 23 }]; I know that it's possible to sort an array of objects by a specific property, but I don't have much experience with for loops. I want to sort the array by age, but I'm getting an error. The expected output should be: arr.sort(function (obj1, obj2) { return obj1.age - obj2.age; }); A: You can write a custom compare function. var arr = [{ firstName: 'Chris', lastName: 'Smith', age: 20 }, { firstName: 'Smith', lastName: 'Jone', age: 20 },
