- Lightweight, but very handy. - Simplicity and intuitiveness of use. - Great choice for you if you don't want to be bothered by a... Easily one of the most useful and helpful pieces of software you can install on your computer. This application allows you to automatically generate travel and activity reports in a very short time. Getting Started with this utility is in fact very simple and straightforward. All you need to do is to unzip the downloaded package, run the executable file and you can get started immediately. The interface is simple and well-organized. Let's have a look at it. The interface of the application is presented as a two-pane layout. On the left, you see the Home section that includes such general information as title, version, author, link to the developer's website and a synopsis with some keywords and a preview of the software's main features. Next to it, the application displays the Downloads section that offers a link to the software's trial version and a special link that will take you to the official website for the extended trial version. On the right, you can find the Home section that again includes some general features such as news and the number of diaries and notes. The third pane displays the main part of the application where you will find all the useful features that the program has to offer. The first feature is the Room Diary which is a tool that allows you to simply write down your daily or weekly activities with text, add photographs and links and easily create a calendar using all sorts of colorful themes. The next feature is the Camera Diary that is a bit more featured as it allows you to add more items than just notes and activities, among which you can also add photos, address book entries, links and even YouTube videos. Also included in the list of features is Hazama's powerful HeatMap. This unique tool allows you to get information about the most commonly used features of the application by simply viewing a visual representation of all your diaries and notes. The most used tabs include the Notes section, the Travel section and the Image section. Last but not least, you will find the Settings tab that basically offers a short description about the user interface, a customisable font choice and the option of using a dark or light theme. The software is really easy to use as you can add any number of diaries and notes in any time period. Moreover, some functionality might not be useful to all users. For example
