Category:Electronic mail Category:Telegrams Category:Telegraphy Category:Telecommunications-related introductions in 1988 Category:Digital project management softwareQ: Importing CSV, inserting duplicate data using an excel macro I have a problem with my macro. It is supposed to import a.csv from ebay and insert the data into a local database on my pc but it creates an entire load of records because it is inserting the imported data into the database twice. If it is inserted into the database for the first time it is inserted, if it is inserted for a second time it is inserted twice into the database. I have set up the table with an Index for the columns as unique but since the imported data has fields that duplicate the data, it is not impossible that two or more items are inserted into the database twice. My question is; how can I get it to insert the data only once into the database. Here is my code: Option Explicit Sub insert() Dim ws As Worksheet Dim lRow As Long Dim strSQL As String Dim cnn As ADODB.Connection Dim rs As ADODB.Recordset Set ws = ThisWorkbook.Worksheets(1) lRow = ws.Range("A" & Rows.Count).End(xlUp).Row strSQL = "insert into [Pardon Pro].[dbo].[Order] ([OrderNumber], [Store], [OrderPlacedOn], [OrderDate]) " _

Customize your work, letting you execute 'fast style' and set initial values for your job. Works for documents in almost any program that can handle a standard PostScript file. Printing simple PostScript files. You can display your work using the Q-1 Plugin. You can save your work using the Q-1 Plugin. You can print your work using the Q-1 Plugin. You can save your work with the Q-1 Plugin. OverLAZ for PostScript is a dynamic system. You can use it easily by selecting option 1, clicking the icon (manual), and right-clicking on the icon, or on the letter form you need to overlay, to open the main menu. Then simply choose "Over_LAZ_1" or "Over_LAZ_2" or "Over_LAZ_3". A: From this post: I tried the free version of OverLAZ PS: it works fine for Windows. You might also want to check out the full version of the PostScript version. It's much more powerful and better designed than the Freebie version, and I don't recall the full version costing that much. Also, Word97, and Word 2002 and up will let you right click an existing document, and choose menu > "Mark Up" > "Document overlay" and select a free poster from the OverLAZ tool palette. Sierra Leone remains in the grip of a nationwide Ebola outbreak, with hundreds of deaths reported since the disease was first detected on Aug. 19. But even as the number of cases and deaths decrease, people in the country fear returning to their villages and schools, and to public places where they have seen death. In Sierra Leone, where most of the country's 30 million people live in poverty, Ebola is regarded as a stigma, and

What's New in the?
