* **Lightroom:** Adobe Lightroom is a photo-editing program for photographers. It enables photographers to organize and edit RAW files. You can create and modify RAW files in Lightroom and create and modify JPEG files with it, but you can't open RAW files in Lightroom. Lightroom has a catalog feature that enables you to manage your photos in an organized manner. Although you don't have to purchase Lightroom, some services like Apple's iCloud Photo Library make it much easier to manage photos. Lightroom has many powerful features that enable you to interact with photos on a different level than Photoshop, and you can also utilize photostrips and layers, as well as the ability to drag and drop. Although Photoshop is still the industry standard, it is no longer the only tool available to photo editors or pros. * **Paint Shop Pro:** The creators of Photoshop also created Paint Shop Pro for their own workflow, and their shared ecosystem isn't an enterprise product, but it's incredibly capable. Paint Shop Pro is often referred to as a _mid-priced_ alternative to Photoshop, and it has many more features than Photoshop. You can download tutorials and articles for it on the Web. If you have a link to a useful tutorial, I recommend keeping the tutorial in your workflow and using it regularly. You may find yourself abandoning Photoshop for Paint Shop Pro, depending on the features you need. * **Painters' Pro:** I'm not going to lie to you; I'm not a painter. I like photographs. However, with so many of my clients coming to me with photographic needs, I appreciate that I can use the specialized features of Painter's Pro to easily perform many of the tasks I use Photoshop for. When I use Painter's Pro, it's to perform specific tasks, and then I go back to Photoshop for the rest of the editing. So use the image-editing tools you're most comfortable with or most effective with. Although the price is high, it's no match for Photoshop, but if you're making a living through photography and need specific tools to do the job, Painter's Pro provides many tools at a reasonable price. It's still more than Photoshop offers at that price. * **Symphony by Steinberg:** I used to use this app all the time when I was in the film school, when I was teaching film and sound editing. I would ask my students

Q: Problem in Recursive function in C for Tree-like Structure I am trying to implement a recursive function that prints the tree-like nodes, where each node has a value and a left branch and a right branch. I have written the following code, void printf_tree(const char *str){ printf("%s ", str); if (str!= "NULL") { printf_tree(str+1); } } This function does not print the actual node values but the memory addresses of strings. It seems that it is fetching the address of string constant "NULL" and using it for the recursive function call. But I am not able to understand why. A: %s format specifier expects the string to be printed while str is the address of a character. Note that str + 1 means str + 1 byte, which is not what you want. Consider using %c specifier which expects a character. #include void print(const char *str) { printf("%s ", str); if (str!= "NULL") { print(str + 1); } } int main() { print("NULL"); print("abcdefghijklmnopqrstuvwxyz"); } Novel targeted therapies for the treatment of myeloma. The multiple myeloma (MM) is an incurable disease, for which the only curative treatment is the removal of bone marrow, followed by a combination of chemo- and/or radio-therapy. Despite these treatments, patients treated for MM have a median survival of only three years. The present review describes new approaches for targeted drug delivery in MM, including the introduction of new drugs such as the proteasome inhibitors bortezomib and carfilzomib, and also the immunomodulatory agents, including lenalidomide and thalidomide, the monoclonal antibodies lenalidomide and elotuzumab, the histone deacetylase inhibitors, and the inhibition of colony stimulating factor 1 receptor signaling. These approaches are combined with classical treatments for MM including melphalan

IN THE UNITED STATES COURT OF APPEALS FOR THE FIFTH CIRCUIT No. 98-30941 Conference Calendar UNITED STATES OF AMERICA, Plaintiff-Appellee, versus DONALD CRAIG GRAVES, JR.,

Defendant-Appellant. - - - - - - - - - - Appeal from the United States District Court for the Eastern District of Louisiana USDC No. 97-CR-110-2 - - - - - - - - - - June 15, 1999 Before EMILIO M. GARZA, BENAVIDES, and PARKER, Circuit Judges. PER CURIAM:* Donald Craig Graves, Jr., appeals his guilty-plea conviction for bank robbery. Graves contends that he was denied due process when the district court failed to inform him of the maximum imprisonment and fine for the offense charged in the indictment. A
