and type MTB in the fetus. (C) Due to reported role of maternal antibody and milk in the transmission of Salmonella, we will apply this approach to milk and colostrum and quantify these organisms in the fetus. (D) Study of the transmission of *S. enterica* serovars by milk from BCs. (E) We will study the fate of live/dead MTB in the cytosol of the trophoblast using LIVE/DEAD (a fluorescent) stain (Aim 4)

(2) Local Pathogen burden in the placenta, fetus and maternal side of the placenta. Our current study uses RT-qPCR for quantitative analysis of transcripts of 3 different pathogen groups (Brucella, Bordetella
