Fifa 22 Features Key:

- HyperMotion Technology uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits to drive the improved player movement and gameplay. This means the dynamic simulation of real-life situations like injury, fatigue and muscle cramps with realistic reaction
- Your game doesn't pause, even when you lose control of the ball, as you juggle controlling the ball with the other demands on your cognitive resources
- Turn-based, realistic AI commentary lets you hear key moments of your game
- Overlaid controls makes FIFA easy to pick up even if you're new to the game. Plus, the new Scout Mode makes it easy to track any player on the pitch with XN Sports Vision.
- More in-depth set-piece movement animations give you an indication of where your teammates will go. Better flow between the various animation sequences
- Better collision awareness means that players snap at attackers like never before, making for a more realistic contact with the ball. It also means that the ball rebounding from a player's foot has less of a chance to become an easy take-on
- The Transfer Market Window flows more naturally, with a look-and-feel more familiar to the last-generation versions
- Create and customize Dream Team 2019 with over 650 player names and stats. Use over 3,100 real-world player images and choose which kit to play in across all disciplines
- Authentic Personality: 290 authentic player signatures are brought to life when you boot up the new Match Day Moments, which plays clips from key games your Pro has participated in
- Five unique Stadiums from five prominent leagues: English Premier League, La Liga, Bundesliga, Serie A, and Ligue 1
- Full English, Spanish, and French pitch settings make for an authentic football experience
- Experience an enhanced Virtual Trainer, which provides additional feedback on your form
