AutoCAD Desktop on Microsoft Windows AutoCAD uses the application programming interface (API) to perform tasks. There are two types of APIs available: Language-independent: AutoCAD has two language-independent APIs: AutoCAD C API and AutoCAD LT C API.

These interfaces support portability and automation. Language-dependent: AutoCAD has several language dependent interfaces including: AutoCAD Architecture Studio AutoCAD Electrical AutoCAD LT AutoCAD Feature Manager AutoCAD Mechanical AutoCAD Structural AutoCAD MEP AutoCAD Site Design AutoCAD Electrical AutoCAD Visual LISP Visual LISP The following tables list the supported interfaces and also provide a short description of each. Main functionalities provided by AutoCAD AutoCAD C API AutoCAD C API uses the Direct x environment which is very similar to ObjectARX environment. AutoCAD LT C API AutoCAD LT C API uses the COM technology for interoperability and also supports portability and automation. ObjectARX API AutoCAD uses ObjectARX API to perform tasks. The ObjectARX is a C++ class library and is based on the COM technology. AutoCAD Foundation AutoCAD has a framework for client applications called AutoCAD Foundation. AutoCAD Foundation provides templates and libraries for performing simple tasks.

Autodesk Exchange Apps AutoCAD uses the AutoCAD Exchange Apps to perform tasks. These apps are not a programming language, but they do have their own language for working with AutoCAD objects and their properties and functions. These apps are a combination of AutoCAD automation and inter-application communication. This apps store can be accessed via Web browser, Microsoft.NET framework, Windows desktop and development tools. It has multiple categories with a few hundred apps in each category. Architecture Studio The Autodesk Architecture Studio allows users to plan and build architectural projects and renderings. Automotive Studio The Autodesk Automotive Studio is a part of Autodesk Architecture Studio and enables users to design cars and 3D print the model. Civil 3D Autodesk Civil 3D is a component of Autodesk Architecture Studio. It allows users to create architectural visualization. Electrical Autodesk Electrical allows users to plan, analyze and install electrical systems. MEP af5dca3d97

The EU is continuing to take a long term view and we are looking forward to working with the UK government and parliament to pursue our future partnership once it is clear that the UK is leaving the EU on the 29th of March 2019," an EU official told Reuters. However, EU officials admit that this could be tricky. "We don't think this is a realistic goal," said one EU diplomat. The other key stumbling block is the UK government's pledge to trigger article 50. The British government has said it will trigger article 50 by the end of March 2017. The EU has repeatedly said it will be prepared to take part in the negotiations. But it may only be prepared to take part on a limited basis, if the UK government has not come up with concrete proposals by November 2017. Websites that support EU membership say that it is likely that the government would have to negotiate some form of customs union and single market access to remain part of the single market. This is something that Angela Merkel, the German chancellor, has promised to not to do. "I don't want to hear the 'we want to be in the single market' (appeal) in this debate," she said in an interview in August. The British government has also said it wants to keep a close relationship with the EU. So what now? When will we know the outcome of the negotiations? Well, according to EU law they could not start until the UK has formally invoked article 50. The UK's prime minister Theresa May has promised that would be by the end of March 2017. As the date comes and goes, we will have to see if the EU will offer anything to help Theresa May go ahead with the negotiations. Theresa May has already said that if the UK decides to leave the EU, she will make sure that EU citizens in the UK have the right to stay in the UK. The EU has responded by saying that it will respect the result of the referendum, no matter how the vote turns
