We also offer one on one classes, for those who like to have a personal touch. BriTune Vocal is an affordable, 12-input vocal console that lets you simultaneously record, monitor, monitor, and cue vocals, as well as create stems and export WAV and AIF files. BriTune Vocal allows you to record, monitor, and cue vocals and consists of four models: Step 1: Recording Elements in BriTune Vocal Step 1: Recording Elements in BriTune Vocal Step 2: Mixing Elements in BriTune Vocal Mixing Elements in BriTune Vocal Step 4: Exporting Files in BriTune Vocal For everything you need to master your vocals, you can use your BriTune Vocal to

record and monitor your vocals with a variety of microphones. Your voice takes on one of five room modes, known as “Room Dimensions,” to make sure that you are in the best vocal position, while offering precise audio control. This can be adjusted in the GUI in the “Mixing Room” feature. The main parameter is the diffusion. This is the vertical spread, for example, of the “microphone” that you are using. The diffusion is measured in microns and can be from 0 to 1000 microns, measured out in the center of the image, where the diffusing area is hard to see on the screen. Mix and monitor your vocals with six different parameters: Monitor In. This adjusts the monitor level and the monitor volume, which can be adjusted from -1 to 10 in the GUI. Monitor Out. This adjusts the monitor volume and the monitor phase. Output Level. This adjusts the output level, which can be adjusted from -1 to 10. Vocals In. This adjusts the channel gain of your vocals. Cue In. This adjusts the channel gain for your cue in, which
