Elcomsoft Password Recovery Bundle Forensic 2014.08 [ChingLiu].Martin Shkreli is best known for many things. One of those is that he is the founder of Turing Pharmaceuticals, and one of the most reviled drug company executives. Turing acquired Daraprim, a drug used to treat protozoan infection, and pushed its price from \$13.50 a pill to \$750 a pill, or more than ten-fold. Now, the feds have subpoenaed Turing, demanding records from the company as part of an investigation into whether the company defrauded the government by getting a drug approved by the FDA with falsified financial data. According to a statement released by the company Tuesday afternoon, it "has cooperated with the Department of Justice in connection with their investigation," and plans to continue to cooperate. The statement also notes that the company has been cooperating with the SEC as part of its own investigation. It's unclear if that means that the company has also agreed to cooperate with the FDA investigation as well. As a result of the impending investigation, Shkreli will likely be barred from serving as an officer, director, or major stockholder in a publicly traded company for 10 years. That move seems to be one of many aggressive steps the company is taking to distance itself from him. While the company is opening a fund that will likely be focused on investments in healthcare, it has removed most of its public comments from Shkreli and reduced his prominence on the website. This is a move that makes it clear that Shkreli is no longer acting as CEO of the company. Turing has also canceled the CEO's private interview for investors, taking the job away from him. Advertisement What he's saying The Washington Post published a lengthy interview Tuesday with Shkreli, in which he spouted off on a variety of topics. On the civil aspect of the investigation, Shkreli said that it is " 6d1f23a050
