I ask for help in resolving the following situation: in December 2018, a leasing (financial lease) agreement for a vehicle was concluded. Under the terms of the agreement, the lessor (I) makes a monthly payment in the amount of 7,600 rubles for car rental. The car is on the balance sheet of the lessor company, because signed a lease with him. Currently, the amount of all monthly payments amounted to about 150,000 rubles (under the contract).
