Share This Image On Google+ .Photo: Zach Gibson/Getty Images The debate over the impact of big-box grocery stores rages on. Some studies have concluded that they make for more socially and environmentally responsible shopping, while others have argued that they diminish the quality of life in neighborhoods whose residents are pushed out of local markets. Whatever the truth of the matter, the effect of a big-box store is predictable: Most people who visit make the same small number of trips, stocking up while hauling away items they can't imagine buying in smaller stores. For high-volume shoppers, the experience is more likely to involve coercion and coercion alone, rather than offering satisfying options. But for those who do bother with large-scale shopping, they see benefits, too. "Purchasing more than once a week in a big-box store is associated with increased physical activity levels in low-income older adults," Jesse McDermott and Peter Van Mosch, two Cornell researchers, write in The American Journal of Public Health. These people tend to walk to the store, and the more often they do so, the more likely they are to walk a lot. Stores like Walmart tend to be on major routes, which make them accessible and more likely to serve customers who can't afford to drive. Last year, c6a93da74d
